PRINTER CONFIGURATION:

To add a form feed after every ticket to ensure it is printed and pushed out of the printer upon completion. Steps shown below:

13. Press the Windows **“START”** button.
14. Select **“Printers and Faxes”** under “Control Panel”
15. Locate **“Generic/Text Only”** Printer
16. Click printer name and select **“Printer”**
17. Select **“Printer Preferences”**
18. Select the **“Paper/Quality”** tab.
19. Change **“Paper Source”** from “Automatically Select” to **“Cut Sheet”**
20. Press “Apply” button then Press “Ok” button.
21. Press “Ok” button on the original dialog box.

Printer should now eject tickets when printed.
